EVIDENCE OF ORIGIN

Bridge cranes	Bridge cranes	
82	Electric bridge crane ABUS ZLK 20 tx 22.5 m (double girder) Telfer GM 6000.20000 L-162.41.10000.3.D 200.20 .10000.3.D 200.20	4
83	Hanging crane ABUS ZLK 20 tx 28.5 m (double beam) with electric hoist GM 6000.20000 L-162.41.10000.3.D 200.20/Electric mobile crane ABUS ZLK 20 tx 28.5 m (double 0004.2 m) L-162.41.10000.3.D 200.20	2
84	Electric pavement crane. Type ABUS ZLK 10 tx 16.5 m (double beam) Front lift GM 3000.10000 L-162.41.10000.4.D 130.20/Lifting crane el. Type ABUS ZLK 10 tx 16.5 m (double beam) El Republic. lift GM 3000.10000 L-162.41.10000.4.D 130.20	4
89	Double deck electric overhead crane/Double electric overhead crane	2
95	Crane, electric suspended double crane / Doublespan bottom electric crane	1
Schnell – 1th section	Schnell machines - section 1	
20	Automatic bending center designed for double-sided bending of reinforcing bars, consists of: bending module (2 pcs), accessories, loading line	1
35	Suitable cutting machine for straightening and cutting rebar (max. ? 13 mm) in a set: container for collecting finished products mod. R12; unwinder capacity 3500 kg mod. PFO/2F; basket capacity 3000 kg mod. Lam3	1
36	Machine for making circles, spirals and curves for fittings with a diameter of \varnothing 6 and \varnothing 40 mm	1
37		3
38	Automatic line for cutting to size for rebar storage, consisting of: CON/SL 8 control panel; operator platform; sectional warehouse FA/4/12; conveyor belt for dosing VA/12/150; hydraulic guillotine CHV160; measuring channel VBM/12/150; warehouse section RK/2; safety photocell for sectional storage RK/3/E; vertical roller conveyor T/1/12DEV./	1

67	Concrete steel bending machine, diameter of bending material 40 mm/	2
Machinery – 2th section	Machine tools - section 2	
23	Electric roller pipe cutter for cutting pipes ? 200 mm includes: pipe holder, cutting disc	1
25	Hydraulic profile bending machine. designed for bending metal bends to obtain the desired profile. The design of the machine allows bending metal at any angle in one step /	1
26	Lathe for processing external and internal cylindrical, conical and other rotating surfaces, front surfaces, grooving	1
29	Lathe machine for cutting screws. Designed for a variety of turning applications including taper turning and threading: metric, inch, riser	1
69	Semi-automatic tape cutter	6
Machinery – 3th section	Machine tools - section 3	
1	Semi-automatic band saw	2
	Radial drill up to 50 mm diameter	2
3	Universal grinder with dust collector	4
13	Electric oven for baking electrodes	4
15	Collapsible protective fence (with rotating brackets)	5
18	Electric furnace for burning and storing welding solvents	2
	Scissor guillotine cutting of plates up to 20 mm thick. Complete with cone rolling equipment and device for central support of plates.	1
22	Hydraulic force of a single column press, t 100. Designed for pressure processing works, especially for pressing, bending, punching, punching. Control cabinet accessories	1
24	Hydraulic pipe bender with electric drive Outer diameter of pipes to be bent 15-114 mm. For cold bending of steel pipes, without mandrel	1
31	Automatic bevel cutting machine for welding the edges of carbon and stainless steel sheets	1
52	Sandblasting machine	10
53	Arc spraying equipment	3

77	Hydraulic ripper with control panel. It is intended for determining the mechanical properties of materials and elements under static loads of up to 1000 kN in tensile, compressive and bending regimes.	1
79	Roller rotator	9
81	The electric reversible winch is used for auxiliary tasks related to the movement of goods on a horizontal track.	3
94	Electric tractor	1
Machinery - 4th section	Machine tools - section 4	
12	Reciprocating compressor	6
27	Milling machine with wide universal supports. Management via the management console.	1
28	Vertical drill for drilling, reaming and countersinking	1
32	Sharpening machine with automatic feed, for processing the edges of carbon and stainless steel sheets for welding	3
33	Flow viscometer with stand	1
34	Universal thickness gauge	1
47	Solvent pump, foot operated - flexible drain pipe and shut off valve	1
49	Illuminated magnifying glass with surface roughness standards (comparative)	1
50	Low voltage wet sponge pore sensor	1
51	ISO 8501-1:2007 reference set (degrees of rust; degrees of surface preparation)	1
55	Dust filter system for the blasting department	1
56	Magnetic thickness gauge	1
57	Coating thickness and adhesion tester	1
61	Pneumatic unit for airless paint spraying	4
62	Electric airless sprayer for heavy paints	2
63	Reversed semi-automatic installation for washing solvent spray guns	1
64	Coating adhesion meter, mechanical	1
65	Moisture meter (dew point)	1

66	Comb for the thickness of the wet layer	4
68	Combined press shears (Combined press shears, press force, t 65. For cutting sheets, long products and structural shapes, making notches, holes)	3
71	Plate dew point calculator	1
76	Motorized airless paint sprayer for light paints	3
88	Pallet truck	1
91	Manual hydraulic forklift	1
92	Manual hydraulic forklift	1
93	Pallet truck	1
1224	Adhesion determination kit by the "grid cut" method.	5
1228	Pump grounding kit	1
