General comments	<b>EVIDENCE OF ORIGIN</b>
------------------	---------------------------

Machinery- 5. section	Machine tools - section 5	
16	Suspension machine for spot welding. It consists of: welding transformer; welding cycle regulator; pneumohydraulic equipment	1
30	Device for powder welding of embedded parts with a diameter of 20 mm, with a power source	2
40	The spot welding machine is used for electric resistance welding of transverse joints of low-carbon steels, alloyed steels, titanium, aluminum and copper alloys, as well as reinforcing steel BI, AI, AII, AIII.	1
41	Machine for spot welding (extension mm 500). Intended for electric resistance welding with alternating current of products with low carbon dioxide emission and made of stainless steel, titanium and aluminum alloys, transverse joints of reinforcing steel A1, B1, A2, B3./	1
42	Machine for resistance welding of products made of low-carbon, low-alloy and reinforcing steel A600C. Contents: hydro station, distribution cabinet, cooling unit	1
70	1200mm reach spot welding machine designed for cross joining of parts and alloys and stainless alloys, alloy steels, titanium alloys, aluminum alloys and rebars	2
72	Installation for automatic welding of steel reinforcing bars to embedded parts, with a power source. Designed for automatic powder welding of reinforcing bars with a diameter of 10-30 mm to embedded parts. Reinforcement material - low-carbon and low-alloy steels	3
73	Machine for welding steel for concrete up to a diameter of 45 mm	2

Machinery – 6. section	<b>Machine tools - section 6</b>	
21	Portal machine for thermal and plasma cutting includes: FVU; list of consumables; compressor	1
44	Four-cylinder hydraulic roller with a plate thickness of up to 32 mm. It is intended for bending sheets of steel, stainless steel or aluminum into the desired shape. Complete with conical rolling gear and central plate holder structure.	1
48	Container compressor station	1
75	Container compressor station	4
80	Self-propelled car with a load capacity of 40 t. Trailer for a car with a load capacity of 40 t	3
87	Self-propelled carts with a load capacity of 20 t	4
90	Heavy export wagon on the railway	2
Machinery – 7. section	<b>Machine tools - section 7</b>	
6	Mobile mechanical self-cleaning filter unit.	25
7	electrostatic filter	10
9	Inverter for welding	2
54	Diesel mobile compressor for compressed air	2
58	Belt sander	5
59	Eccentric grinder	5
74	Marking tape "Compressed air" color: blue	2
78	System for dedusting the metallization department	2
Machinery – 8. section	<b>Machine tools - section 8</b>	
8	Semi-automatic welding machine with power supply unit, guns, cooling module	2
10	Welding center (column) for welding machine, with mobile welding head A2-A6; power supply unit LAF 1001	1
11	Arc welding machine with control unit	4

14	Inverter welding machine. Welding current range, A 3 - 400	10
	Guillotine knee shears with feeder are used for straight cutting of sheet and strip materials up to 32 mm thick. Contents: dispenser UP11, retractable trolley model T6	1
60	Installation of an aerosol paint dry filter for air cleaning	3
Machinery – 9. section	<b>Machine tools - section 9</b>	
5	Semi-automatic shielded gas welding device in one set: power source, wire feed, burners, cooling module.	44
17	Telescopic tower for bridge crane maintenance	1
297	Welding equipment for manual welding. Nominal welding current, 90 A (100% duty cycle)	36
Furniture- 10. section	<b>Furniture - 10 sections</b>	531
